---

Paul;

EPA agrees that the booms may be removed but that the twice-monthly monitoring will continue.

Subject: NWOD Canal Sheen Inspection - October and November 2012

---

Kathy, Liz, and Bill.

The inspection reports for October and November are attached for your review. In addition to the two inspection reports in November, we have completed two inspections for December for a total of four since re-flooding the canal. All four of these have had a general absence of sheen behind the booms (outside of intermittent, isolated bands of silver sheen observed once during December) or on the surface water of the

canal in Segment 2A.

With these good results I **request EPA's approval to remove the booms** so we can avoid the issues we had with the booms and tumble weeds in Segment 1 last year. The twice-monthly monitoring would continue.
